

# EthosEnergy

**EthosEnergy Light Turbines LLC (EELT)** is the world's leading independent supplier of Solar® gas turbine overhaul services for power generation, oil & gas, petrochemical, pipeline, industrial and marine markets.

## Why use EthosEnergy?

- Independent from OEMs
- Widest range of gas turbines service capabilities
- In-house advanced repair technologies
- Global capabilities and resources
- Responsive, cost-effective, quality service

Our extensive overhaul capabilities cover the following equipment types:

- Solar® Mars 100, Taurus 60, Centaur 50, Centaur 40 including SoloNox® for each, and also Mars 90 and Saturn 10
- Solar® Gas Compressors: C30, C28, and C16

Our proven approach results in product quality and excellence in customer service and delivery of your equipment on time with more effective budget management through the minimization of unscheduled downtime.

Through the establishment of working relationships with our customers, we make every effort to develop maintenance practices specifically aligned to your operating environment bringing an integrated service and maintenance solution to comply with your unique needs.

## ***Our services include, but not limited to:***

- Engine overhaul & exchange services
- Gas compressor overhaul services
- Lifecycle cost reduction
- Decommissioning and relocation
- Test cell facility
- Capital spare parts and consumable inventory
- Re-manufactured component repair
- Field services:
  - Periodic inspection
  - Emergency call out
  - Package commissioning
- Control systems
- Supply of equipment & packages
- 24/7 Remote condition monitoring
- Training
- Innovative solutions

### ***Adding Value to Field Service***

**EELT** delivers field engineering services utilizing highly trained employees to quickly respond to your service needs 24 hours per day ensuring reliability while reducing maintenance costs.

**EELT** can prepare special training classes to fit a particular customer requirement. Training can be conducted on your site or with hands-on class room training.

### ***Service Excellence***

**EELT** goes through rigorous testing procedures in addition to qualify control testing of the components. Each unit must pass:

- Overhaul inspection
- Mechanical integrity test
- Performance test
- Emission test
- Customer witness test

Our extensive inventory includes EthosEnergy Advanced Parts (APM®) designed and manufactured by our global network of skilled Engineers providing quality replacement parts every day to exacting standards that are directly interchangeable with existing engine components and assemblies.
