

Aero Engine Electrical Repair Services

Repair Solution

Fault finding unserviceable components is very time consuming and premature failure could result in the need to purchase of high cost replacement parts. EthosEnergy offers an alternative solution to operators by providing a comprehensive repair service including:

- + Replacement electrical connectors
- + Sensor repair / replacement
- + Rewiring of damaged harnesses
- + Full testing and certification
- + Replacement of protective braiding
- + Exchange service

EthosEnergy have comprehensive process and repair development capability, improving yield and minimizing replacement parts cost.

Repair Development Service

EthosEnergy in Duncan, South Carolina supports the global aviation industry with repair services is backed by OEM and regulatory approval. Our experienced engineers are capable of fault diagnosis and full repair development, including reverse engineering and DER repairs.

Repair Overview

Modern aero engines contain an array of complex electrical accessories and components performing vital tasks related to engine management, instrumentation, actuation and distribution of electrical power supply to an ever increasing number of aircraft components.

In-service Degradation

These robust units provide many years of reliable service, however they are subject to hostile environments including, wind turbulence, temperature variation, vibration, contamination and handling damage.
